B200 VT-MPT
Shreeji Aviation

Skyland Aviation is successfully managing and operating four fleets under their purview. Among these two are B200 aircrafts, with call signs VT-MPT (Shreeji Aviation) and VT-LMW (KPI Aviation).

B200 VT-LMW
KPI Aviation

BELL 407GX | **VT-NJP, VT-PJN**
KAN Aerofoil

Bell 407GX Helicopter, call sign VT-NJP & VT-PJN (Kan Aerofoil Private Limited) and the forth is Citation XLS+ VT-DBI (Dilip Buildcon Limited). This diversification in aircraft types indicates Skyland Aviation's versatility in catering to different aviation needs, whether it be fixed-wing or rotary-wing aircraft. The successful management of these assets reflects their commitment to safety, efficiency, and client satisfaction in the aviation industry.

Citation XLS+ | **VT-DBI**
Dilip Buildcon Limited

Upcoming Fleets

| **BELL 429**

Skyland Aviation is excited to announce the addition of two new aircraft to its fleet : a Bell 429 and a Robinson R66 helicopter. The Robinson R66, known for its reliability and versatility, will enhance the company's fixed-wing services. Meanwhile, the Bell 429 helicopter, renowned for its speed and efficiency, will boost the company's rotary-wing operations. These additions represent a significant investment, ensuring Skyland Aviation continues to meet and exceed client expectations.

Complete NSOP Solution

- ✦ Skyland provides a comprehensive and tailored solution for obtaining the Non-Scheduled Operator Permit (NSOP) from the Directorate General of Civil Aviation (DGCA) in India. Our service encompasses a meticulous understanding of DGCA regulations, ensuring that your application adheres to the latest requirements. We guide you through the entire process, starting with the eligibility checks, where we assess your financial stability and operational capabilities to meet DGCA standards.
- ✦ Our expert team assists in compiling a thorough set of documentation, including the NSOP permit application form, company details, financial statements, aircraft specifications, and operational manuals. We prioritize a detailed review of your financial standing to meet DGCA's criteria, ensuring a smooth application process.
- ✦ Skyland goes beyond documentation by providing support in demonstrating operational capabilities, a crucial aspect for DGCA approval. Our goal is to streamline the NSOP application process, offering a reliable and efficient solution for operators seeking compliance with DGCA regulations. Choose Skyland for a hassle-free experience in obtaining your Non-Scheduled Operator Permit, backed by expertise and a commitment to aviation regulatory excellence.
- ✦ Currently Skyland Aviation is managing two NSOP under their pursuit,
 1. **Shreeji Aviation Private Limited**
 2. **Kan Aerofoil Private Limited**

MRO Services

MRO (Maintenance and Repair Organization) services encompass a broad range of activities aimed at maintaining, repairing, and ensuring the operational readiness of diverse equipment within the aviation industry. These services are essential for ensuring safety, extending asset lifespans, minimizing downtime, and optimizing operational efficiency. MRO services include scheduled maintenance, corrective repairs, and inspections to maintain performance standards and comply with regulatory requirements, ultimately supporting smooth and reliable operations. Currently, our Surat base hanger is under construction, and we are planning to open a new hangar in Surat and Ahmedabad.

HELIPORT

The Heliport in Ahmedabad is designed to accommodate multiple helicopters, featuring ample parking facilities and a state-of-the-art terminal building. This facility includes a VIP lounge, offering a comfortable and luxurious environment for guests. The heliport aims to provide top-tier services and convenience, ensuring a seamless experience for both passengers and operators. With its strategic location and premium amenities, the Ahmedabad heliport sets a new standard for helicopter operations in the region.

Air Ambulance

An air ambulance is a specialized aircraft equipped with medical facilities and staffed by medical professionals. Its primary purpose is to transport individuals who require medical attention or critical care from one location to another. Air ambulances play a crucial role in rapidly transporting patients over long distances, especially when ground transportation might be impractical or too time-consuming. Key features of air ambulances include :

Medical Equipment: Air ambulances are equipped with advance medical equipment to ensure that patients receive the necessary care during transport. This may include life support systems, monitoring devices, and medical supplies.

Medical Personnel: A team of medical professionals, such as doctors, nurses, and paramedics, accompanies patients during the flight. These professionals are trained to handle medical emergencies and provide critical care in the air.

Types of Aircraft: Air ambulances can vary in terms of the type of aircraft used. Some may be fixed-wing aircraft, like airplanes, while others may be rotary-wing aircraft, such as helicopters. The choice of aircraft depends on factors such as the distance to be covered, the medical condition of the patient, and the accessibility of the locations involved.

Patient Types: Air ambulances can transport various types of patients, including those in critical condition, individuals requiring organ transplants, or patients in need of specialized medical facilities available at a different location.

Emergency and Non-Emergency Transports: Air ambulance services cater to both emergency and non-emergency medical transports. In emergencies, they can provide rapid evacuation and transportation to medical facilities. In non-emergencies, they may be used for planned transfers between healthcare facilities or for medical repatriation.

Air ambulance services are essential for ensuring timely medical interventions and transportation for individuals in need, especially when conventional means of transportation are not suitable for the patient's condition or when time is of the essence.

Sky Petals

*A Magical Aerial Flower Shower for
Unforgettable Celebrations*

Elevate your special event with a touch of enchantment as vibrant petals cascade from the sky in a mesmerizing flower dropping ceremony. Imagine the thrill and beauty of a helicopter gracefully showering the venue with a cascade of blossoms, creating an unforgettable and visually stunning spectacle for weddings, celebrations, or any momentous occasion. Let the petals fall like nature's confetti, adding a magical and romantic ambiance that will leave a lasting impression on you and your guests. Experience the joy of this unique aerial display, turning your event into an extraordinary celebration marked by the beauty of nature descending from above.
